ABOUT THE STUDIO

From Your Plan to a Complete Model.

Ribhus is a Scan-to-BIM studio that converts scanned drawings, hand-drawn plans, and CAD files into fully coordinated 3D BIM models in ArchiCAD or Revit - rendered, scheduled, and quantified, on a schedule you can plan around.

We work as an embedded monthly studio partner for architects, developers, and contractors who need a reliable BIM production pipeline. Every deliverable - model file, renders, and bill of quantities - is packaged and shipped together.

*"Delivered natively in ArchiCAD or Revit -
whichever your pipeline already runs on."*

[RENDER / 3D VIEW]

PROJECT SUMMARY

A contemporary hillside residence in the Doon Valley. Large glazed facades frame panoramic views while strategic screening maintains privacy. Passive solar principles guide orientation and fenestration throughout the building.

SPECIFICATIONS

PROJECT SUMMARY

A minimalist residential interior inspired by wabi-sabi aesthetics. Warm concrete, natural oak, and raw linen create serenity. Bespoke joinery doubles as space dividers, maximising the open loft feeling.

SPECIFICATIONS

CLIENT	Private Client
LOCATION	Gurugram, Haryana
GFA	1,800 sq.ft
